

The CubeStation Pro

Designed by a physio, for physios."

First In India

Premium Glass Top

Matte Edition

Customization

Glossy

Indestructible strength.

**3 years structural
warranty**

India's First Ever

250 kg Payload Capacity: Engineered with a military-grade 3mm steel base plate and a 1.5mm central column, this workstation is practically indestructible. It easily handles up to 250 kg of continuous weight, providing absolute stability for your high-value electrotherapy investments .

- First-in-India Anti-Microbial Shield: For the first time in India, a physiotherapy trolley features a medical-grade anti-microbial powder coating. This specialized finish actively suppresses bacterial growth on contact, entirely resists harsh chemical disinfectants, and guarantees a 100% rust-free life cycle.

ErgoSlot

Ergo Slot: Instant Access. Clutter-Free Care

Seated-Height Ergonomics. Zero Mess.

Traditional trolleys force constant bending and messy workspaces. The CubeStation Pro introduces a built-in, recessed storage vault on the upper right flank to revolutionize your bedside workflow.

- All-in-One Dock: Securely holds ultrasound gel, tissues, and medical tapes upright in a single location.
- Zero-Bend Access: Positioned at natural arm's length so you can work comfortably while remaining seated.
- Liquid Safeguard: Keeps sticky consumables away from the top deck, eliminating fluid spill risks on your machines.

Dedicated Back-Storage: Hidden Power. Clean Presentation

Maximum Capacity. Zero Visual Clutter.

Tangled wires and scattered accessories ruin a clinic's premium look. The CubeStation Pro solves this with a spacious, multi-tier storage vault hidden entirely inside the rear column.

- Auxiliary Machine Bay: Perfectly houses secondary diagnostic units or backup TENS modalities out of the patient's sightline.
- Rehab Gear Hub: Cleanly stores everyday clinic essentials like weight cuffs, electrodes, patient leads, and towels.
- Heavy Base Support: The reinforced lower tier is robust enough to carry a heavy UPS battery backup box.

Dedicated Back storage

Ultra-Silent

Dual Foot Brakes

Not Just Handle. A Shield for Your Modalities

This is far more than an ordinary push handle. It acts as a passive, structural wall buffer that guarantees a permanent air-circulation zone for your equipment. By preventing rear ventilation fans from getting blocked against the wall, it eliminates overheating and protects your expensive machines from breaking down—even after 8 hours of continuous clinical use.

Air Buffer Zone

Dead- Silent Transit. Heavy-Duty Control

These aren't ordinary plastic wheels that rattle, scratch, or crack. The CubeStation Pro is fitted with medical-grade, shock-absorbing castors that glide silently across clinic floors while shielding your sensitive electronics from rough vibrations. It effortlessly handles a heavy 250 kg payload with a smooth, 360-degree swivel that makes moving your equipment feel weightless. Once at the bedside, the dual front foot-brakes lock instantly, keeping your entire workstation rock-solid and completely stationary during delicate patient care.

CubeStation Pro

PATENT PENDING

- 250kg weight capacity .
- Ultra thick 3.0mm sheets Used for better Durability.
- India's First Anti- Microbial Powder Coated Trolley .

Physio cube

Other brands

- Wobble under 20kgs, Flimsy frames.
- Cheap, thin sheet ($<0.8\text{mm}$) that flexes and sags.
- Standard paints chips easily, traps bacteria, rusts.
- No dedicated slots, left messily on top.
- Flat backs pushed against walls, blocks air flow,
- Exposed devices, highly unprofessional looks.
- Cheap plastic wheels, rattle, scratch clinic floors.
- Typical 0 to 1 year, no guarantee on structure.

Built by a Physio. Engineered for Pride.

Designed by a physio, for physios."

As a physio with a Master's from the University of **Salford, UK**, I returned to India and faced a frustrating reality: clinical trolleys were either outrageously overpriced or completely failed to meet our daily practical needs. That's why I, **Dr. Pavansai A** (MSK Specialist), founded PhysioCube to create India's first ever clinical trolley designed by Physio for Physio's. After 6 months of rigorous R&D and relentless fine-tuning, we perfected a premium, durable, and highly customizable solution that doesn't compromise on ergonomics—or your budget. This isn't just a piece of equipment; it's a standard-shifter that elevates your clinic's identity, solves real operational bottlenecks, and respects your pocket. You deserve tools built by someone who understands your hustle. Invest in the professional identity you've earned—upgrade your clinic with PhysioCube today.
